

Tyler Herman

User Experience and Product Design

Dear Hiring Team,

I'm excited to apply for the UX Designer position at Roots. With over 12 years of experience designing intuitive, responsive web and mobile applications, I specialize in turning complex systems—like financial and healthcare platforms—into clear, human-centered experiences. At AcuityMD, I led the design of a CRM platform now used by 175+ MedTech brands, building scalable systems and improving engagement by 80%.

Roots' mission to make real estate investment accessible resonates deeply with me. I think you're on to something helping with the housing crisis in American. I would love the opportunity to bring my design expertise, problem-solving approach, and passion for empowering people through technology to your team.

My portfolio is available at tylerherman.dev. Thank you for your time and consideration.

Sincerely,

Tyler Herman
